MIGRATION TO ZEDFIELD MINING – A 12 YEAR PROCESS

Zedfield Mining Limited is a Zambian owned Company that has evolved in three stages. We have a combined experience in mechanized underground contract mining of twelve years.

STAGE 1

We started as Rig Resources Limited, a Zambian owned company, with underground mine development contracts at Mopani, a Glencore owned mine for six years. We were the first Zambian contract mining company post privatization, to fully mechanize with brand new Atlas Copco equipment.

STAGE 2

We went into a second phase of our operations in 2014 for another six years as a Joint Venture (JV) with Redpath Canada. The JV was called Redpath Rig Resources JV Limited and continued to execute contract jobs at Mopani Copper Mines, Lubambe Copper Mines and Kansanshi Mines. The JV accorded the Zambian partners an opportunity and experience to up skill into a Tier 1 contractor by tapping into the global Redpath Group support and best practices.

STAGE 3

On 1st October 2020, we migrated into the third phase being the dissolution of the joint venture with an agreement of neither party, Rig Resources or Redpath would use the name REDPATH RIG RESOURCES JV to conduct business. On 23rd October 2020, Zedfield Mining Ltd was incorporated and will continue with contract mining jobs, not only in Zambia, but other countries as well.

We are currently working with Epiroc, labor hire contract for Drill Rig Operators and technicians, on the Mopani Long Hole Drilling project at SOB shaft. This project aims to improve the quality of the holes drilled and process. We also have a hauling contract at Lubambe Copper Mines.

We have the experience and expertise to execute projects safely, timeously, on budget and to the benefit of all stakeholders
